

PEACE OF MIND SECURITY MEASURES

In today's world, security threats are many and ever-evolving, making it imperative that you are confident in the security precautions you and your vendor partners have deployed. **REVCO SOLUTIONS** takes data confidentiality and protection seriously, and demonstrates this by our pursuit of security certifications, including:

- HITRUST (r2) Certification - the most rigorous available
- PCI DDS Level 1 Certified
- SOC2 Type II Certified
- Information Security Awareness Certification for all employees

For the past 12 years, the healthcare industry has had the highest data breach costs. In 2022, the healthcare industry paid an average of \$10 million for a data beach. Threat researchers believe the upward trend of attacks will only continue to grow in 2023.

CYBER SECURITY

In the event of a patient data breach, the targeted organization is liable to provide written notice to all patients who may have been affected by the breach. Postage alone could run into the millions, with the disruption in business caused by the breach causing additional loss in revenue.

Revco Solutions carries \$20m in Cyber + Liability Coverage

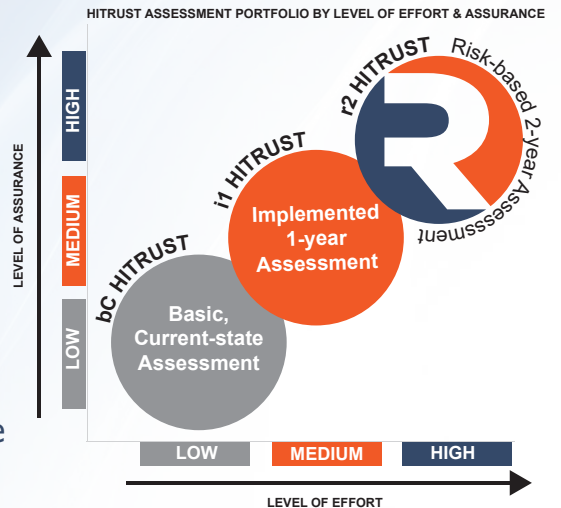

HITRUST

The HITRUST Assurance Program is the most rigorous information protection available, consisting of a multitude of quality assurance checks both automated and manual.

Revco Solutions is HITRUST (r2) Certified

Considered the Gold Standard in HITRUST certification, r2 is a 2 year, risk-based assessment

- Expanded Practices Reliability
- Adds Efficiency
- Risk-Based Approach
- Highest Level of Assurance
